Projects

Hotel Management System ⧉
- This project intends to introduce more user friendliness in hotel bookings and record management.
- **Python** has been used for the interface and creating a menu for the user.
- **MySQL** has been used for data storage.

Donation App, *Flutter & Firebase* ⧉
- I have built this project along with a team. It aims to encourage donating.
- I have worked on the Home Page and the footer of the app using **flutter**.
- My part also included integrating **Firebase Authentication**.

Electric Vehicle Charging Station Tracker, *Fluter & Firebase* ⧉
- This project helps electric vehicle owners find a nearby electric charging station conveniently.
- Uses **flutter** for frontend and **firebase** for backend to store user and vehicle data.

Awards

Scholar Blazer Holder, *New Era Public School*
Awarded for maintaining a CGPA more than 9.0 for 3 consecutive years.
